

THOMAS INDUSTRIES, INC.

DISCOVER THE THOMAS ADVANTAGE

Welcome to Thomas Industries, Inc., where precision meets innovation in sheet metal fabrication and enclosure solutions. For over five decades, we have been dedicated to providing our customers with superior metal fabricating services, characterized by exceptional quality, value, and responsiveness.

OUR CAPABILITIES

» Sheet Metal Fabrication

We utilize state of the art and comprehensive processes to meet the competitive demands of the industry and are able to provide prototypes, short runs, volume production, and aggressive lead times.

» Welding

We have many years of experience with welding in commercial applications utilizing a variety of materials including steel, stainless steel and aluminum.

» Lasering

Our Co2 and fiber optic lasers can cut a wide range of material types, sheet size and thicknesses with speed, accuracy and versatility.

» Pem Insertion

We provide high speed pem insertion for all types of nuts, studs and other types of fasteners.

» Finishing & Assembly

Well established connections for all your finishing needs, including but not limited to: Powder Coating, Anodizing, Chromating, and Zinc Plating. Our services also include metal finishing, including highly polished surfaces for lab equipment and other precision applications.

UL508A CERTIFIED ENCLOSURES

» Standard Electrical Enclosures

We offer the following UL listed types: 1, 2, 3R, 4, 4X, 12, 13.

In addition, we offer back panels and accessories such as window kits and print pockets.

» Custom Electrical Enclosures

We can build enclosures to meet your custom needs. Save time and money on drilling holes or making cutouts. Our cost-effective process works even for small quantities.

RELATED SERVICES

» Cutting

» Grinding

» Punching

» Drilling & Tapping

» Forming

» Milling

» Tube Bending

Our procedures and process instructions are robust, time proven and in line with ISO protocols. We pride ourselves on our workmanship, attention to detail and continuous improvement.
